INJECTION SYSTEMS

HOT BLOCKS, COLD BLOCKS,
NOZZLES & MONOBUSES

GR
RABOURDIN

THE MOST OF YOUR TECHNIQUE !

KNOW-HOW

Our mastery of the design and manufacture of tooling enables us to offer our customers advanced technology for quality parts. To ensure optimal product quality, we choose the best manufacturers of raw materials and supplies to support you in today's complex markets. Our hot runner systems are designed to boost your process !

Our sales and technical teams are available to provide advice and technical support to help you find the right solution.

The benefits of RABOURDIN technology :

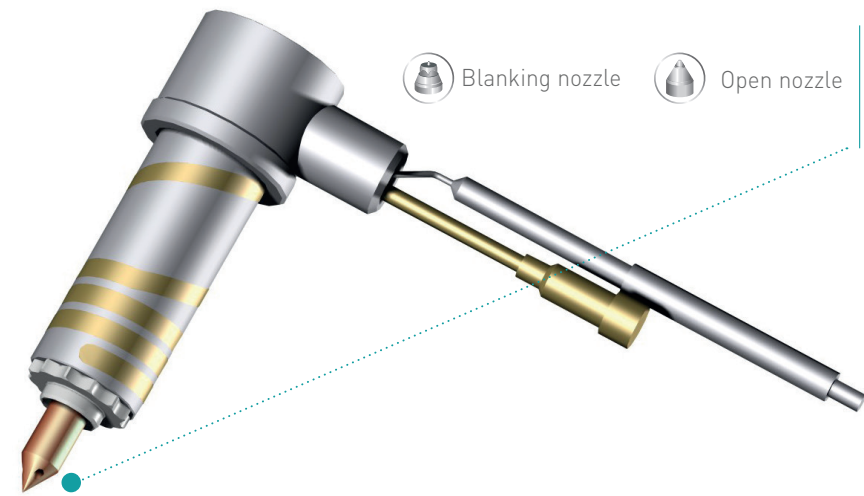

SERVICE EPA

ALL MAKES OF INJECTION SYSTEMS

In order to optimise the reliability of increasingly complex systems, we provide an integrated after-sales service with recognised experts for the development and improvement of injection processes.

Our specialised technicians are committed to keeping your systems running smoothly and are available to troubleshoot your plastic injection moulding systems, regardless of brand, wherever you are!

Our service includes analysing the cause of the problem, checking or changing the heating elements if necessary and conditioning the injection nozzles.

ACCESSORIES

With its expertise, RABOURDIN offers you a complementary range of hot and cold blocks.

- Temperature controller
- Harting sockets
- SERVICE
- Plate machining
- Hydraulic cylinders
- Insulating plates to plan and standard
- Single nozzle range RP 400 / RP 600 / RP 800 / RP 1200

RABOURDIN OPERATES IN MANY FIELDS :

AUTOMOTIVE

ALIMENTARY

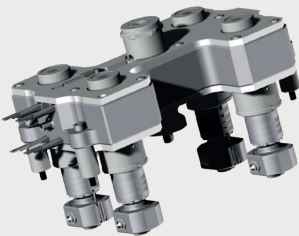

MEDICAL

AERONAUTICS

TECHNOLOGY

The regulated channel systems are built into the upper part of the mould, including the resin distribution channels and the nozzles feeding each mould cavity. The whole system is regulated by appropriate water circuits.
